<http://ubbithub.csubb.ro/>

Founder, Cluj Y.Tech

January 2017 -

Cluj Y.Tech is a community of young techies, studying in Cluj. We feel responsible for our own trajectory so for that, we study and practice software development in school plus on our own free time. We believe that we should absorb all the knowledge we can from University, but there are more knowledge, experience, and ideas out there. Cluj is a vibrant city and we should take advantage of being here! And for that, we think we can do more if we stand united!
